

EDYC outboard motor storage identification survey

Survey 2026

(2nd year) Applicable Nov25 and thro May 26

Managing outboard storage to maximise the rack space available has become a challenge. The Executive have little information upon which to improve the system and hence are conducting a registration and survey process. We suspect a number of outboards on the racks are not being used.

Outboards in the green shed are tagged by Exec with a coloured numbered disc secured by a cable tie at/near the carry handle of the outboard. The discs are: as shown below.

The Exec instructs each member whose outboard has been tagged to provide a small email to assist our management. The small email to web@edyc.co.uk must contain:-

The Tag No, The colour of the Tag
The outboard manufacturer , The Outboard Horse Power (HP)
Any distinguishing Features
An indication of usage
And **most importantly the Owner's Name.**

Remember you only have to provide one email of information for your outboard – unless you have more than one.

Afterwards as our rules (49) say – equipment/outboards whose owners who cannot be identified after reasonable enquiry, the outboard may be moved, possibly eventually being treated as abandoned property.

Reasonable enquiry will be an email sent to each club member asking the member to identify their outboard in the shed and to tally it to the numbered tag secured to the outboard carry handle via email.

Exec ask members storing outboards to cooperate with this survey and the outcome will be to members benefit perhaps freeing more rack space in the shed.

Exec have to conduct this survey several times, eg once in winter and perhaps once or twice in our active period/season. We will welcome suggestions and comments from members on the topic. Emails to web@edyc.co.uk with Outboard in the subject line – emails may not be acknowledged immediately.

EDYC Exec 27th Nov 25
